Soil Erosion and Sedimentation Control Plan

As required by law: R323.1703

A. Expected Project Start Date: _____ Expected End Date: _____

B. Timing and sequence of each proposed earth change: when control measures will be installed, begin digging, back fill, final grade, final stabilization (landscaping), and when control measures will be removed.

Month/Year	Jan 20__	Feb 20__	Mar 20__	Apr 20__	May 20__	Jun 20__	Jul 20__	Aug 20__	Sep 20__	Oct 20__	Nov 20__	Dec 20__
Dig Start												
Control Measures in												
Backfill												
Final Grade												
Final Stabilization												

C. Individual responsible for onsite erosion control during construction:

Name: _____ Contact #: _____
 Email: _____

D. Detailed Permanent Final Stabilization/Landscaping Plan:

a. What will be done to stabilize the site:

- Topsoil, seed, mulch
- Seed, straw mulch
- Seed, straw mulch blanket
- Landscaping
- Other: _____

b. Who will be doing final stabilization/landscaping:

- Builder
- Excavator
- Landscaper
- Homeowner

c. Name: _____ Contact #: _____
 Email: _____

d. When is the landscaping expected to be done: _____

Estimated Cost of Soil Erosion Control

\$ _____

The soil erosion officer has 30 days to review the presented application, but typically the soil erosion control permit can be issued between 5-10 business days. If work begins without benefit of permit, there will be an additional \$75 charge at time of application.

The project must be staked before the soil erosion officer can inspect the proposed earth change activities and issue the soil erosion control permit. All earth change activities must be presented.

Any changes to the proposed earth change activities made to the project after submission of the permit application must be presented to and approved by the soil erosion control officer before the changes have started.
